

ELAC

The life of sound.

Debut 2.0™ Series by Andrew Jones.

Everything we do is different.

Few speakers have garnered such critical acclaim as the original Debut Series by ELAC. They established a new value proposition, with build quality and performance never before attainable at such an affordable price. Debut “changed the game,” and has now changed it again with the Debut 2.0 Series—proof that ELAC can’t leave well enough alone. Redesigned from the ground up, these speakers sound even more remarkable than the ones that sparked the revolution in affordable high-end sound.

Debut OW4.2
Aramid-Fiber
On-Wall Speakers

The last frontier in integrated sound.

Finally, a no-compromise solution for a total surround-sound system when space is at a premium and performance is top of mind. The compact proportions of the Debut OW4.2 make installation on side or rear walls a breeze. Bring huge dimensionality to your system with a speaker that makes itself heard but barely seen.

DEBUT 2.0 SERIES FEATURES

New Tweeter with Wide-Dispersion Waveguide

A new silk-dome tweeter features a wide-roll surround and takes response up to 35,000 to make surround-sound music and soundtracks come alive.

New Woven Aramid-Fiber Woofer

The revised shape of the aramid cone offers even greater stiffness and damping, far superior to polypropylene or paper. The added strength allows more flexibility in design to achieve a smoother, more extended low-frequency response in multi-channel systems.

New Cabinets for Easier Placement

Thick MDF cabinets with a luxurious textured vinyl finish are easy to integrate into your listening room, thanks to a shallow depth of less than four inches. Their efficient bass-reflex design delivers full-frequency performance that belies their modest size.

OW4.2 SPECIFICATIONS

SPEAKER TYPE	2-way, bass reflex
FREQUENCY RESPONSE	70 to 35,000 Hz
NOMINAL IMPEDANCE	6 Ω
SENSITIVITY	87 dB at 2.83 v/1m
